2027 Calendar -- based on a tetratetraflexagon -- Ralph Jones 12262012

Cut out along red lines into four pieces. Align the pieces back-to-back with February behind October, May behind July, and June behind March. Glue carefully, leaving January and April. When glue has dried, crease the lines. To assemble, fold October onto November, and December onto the blank. Continue folding July onto August, and September onto the blank. Finally, glue the backside of April behind January. Flex and enjoy the twelve month calendar.
